

Data Technician Workbook Week 6 Python

Name:

Course Date:

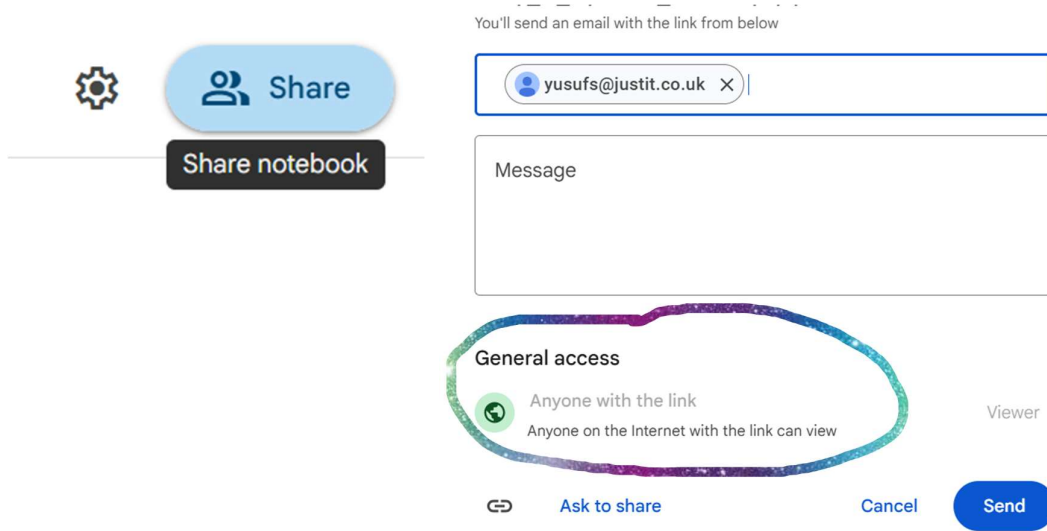

Table of contents

Day 1: Task 1	4
Day 2: Task 1	4
Day 2: Task 2	5
Day 4: Task 1	6
Day 4: Task 2	6
Day 4: Task 3	7
Course Notes	7
Python Additional Resources	8
Exercise 1: You can complete training on this website.....	8
Exercise 2: Complete exercise on Google Colab and share your notebook with the trainer.....	8
Exercise 3: Complete exercise on Google Colab and share your notebook with the trainer.....	9
Exercise 4: Challenge yourself on hackerrank. Solve Python HackerRank	9
Exercise 5: Practice on CodingChef. Print Coding Chef Question in Python.....	10
Exercise 6: Kaggle Data Visualization: Learn Data Visualization Kaggle	10
Exercise 7: Kaggle Pandas Tutorial: Learn Pandas Kaggle.....	10
Exercise 8: Video: Learn Pandas in Under 3 Hours Filtering, Joins, Indexing, Data Cleaning, Visualizations - YouTube.....	10

How to Share your notebook

- 1) Select share
- 2) Enter and add trainers' email **Yusuf.Satilmis@leepgroup.com**
- 3) Make sure that you set General access to Anyone with the link.
- 4) Press send.

You'll send an email with the link from below

Day 1: Task 1

- 1) Follow below link.
<https://colab.research.google.com/drive/1X2y7wcJ768lPnnq4HEOK2hpeefz3Bzl5?usp=sharing>
- 2) Save a copy of this notebook in your Drive and rename by adding your name to the end.

File Edit View Insert Runtime Tools Help

- 3) Go through the notebook and complete the exercises at the end.
- 4) Share your notebook with your trainer.

Day 2: Task 1

- 1) Follow below link.
- 2) https://colab.research.google.com/drive/1FM6s6Dqg_tTSqn0wAuTa0aTX_vkYwkEJM?usp=sharing
- 3) Save a copy of this notebook in your Drive and rename by adding your name to the end.

File Edit View **Rename notebook** Tools Help

- 4) Go through the notebook and complete the exercises at the end.
- 5) Share your notebook with your trainer.

Day 2: Task 2

It is a common software development interview question to create the below with a certain programming language. Create the below using Python syntax, test it and past the completed syntax and output below.

FizzBuzz:

Go through the integers from 1 to 100.

If a number is divisible by 3, print "fizz."

If a number is divisible by 5, print "buzz."

If a number is both divisible by 3 and by 5, print "fizzbuzz."

Otherwise, print just the number.

Use loops and if statements.

Paste your completed
work to the right

```
num = int(input("Enter a number between 1 an 100:"))  
  
if num % 3 == 0 and num % 5 == 0:  
    print("FizzBuzz")  
  
elif num % 3 == 0:  
    print("Fizz")  
  
elif num % 5 == 0:  
    print("Buzz")  
  
else:  
    print(num)
```
